Clones 667, 777 and 114 were harvested 2nd of April, 2013 and fermented out together in one small open top fermenter. Average brix at harvest was 24.3

SOMERSET 2013 PINOT NOIR

WEATHER:

Growing season 2013 was one to be remembered. Sunny, warm weather graced the vines and vineyard during all critical growth stages and carried on through to March. A small bout of rain in early March prevented this season from being all but perfect weather wise. The resulting harvest was short and relatively condensed, resulting in lovely fruit with full flavour and maturity.
